Accuratus Personal Wearable Body Camera

About

The Accuratus Body Camera is a useful tool for any security officer. Simply clip it on to your uniform, then use the intuitive layout to instantly record video, take photos, or even capture audio.

Includes an infra-red “night vision” mode for filming in the dark, and a motion detection mode that automatically begins recording when triggered, giving you maximum security.

Red and Blue LED’s on the front of the camera can be activated by the buttons.
